

## PRESS RELEASE

# Noesis Solutions adds UK, Ireland, Korea and India to its global Optimus distributor network

Leuven, Belgium, February 12 - 2013 – Noesis Solutions, the developer of Optimus<sup>®</sup>, announces the further extension of its global distribution network. The company appointed new resellers operating from the UK and Ireland (Wilde Analysis), Korea (CD-adapco) and India (Aetos Design & Engineering). They will support the increasing number of worldwide manufacturing companies adopting the Optimus-driven 'Engineer by Objective' development approach. By having Optimus automate and coordinate their existing simulation processes and tools, they are able to decrease design time 30% and increase design performance 10% or more. The extended team of sales representatives and resellers will contribute to the business growth of Noesis Solutions, further building on the company's 50% revenue increase in 2012.

### New Optimus distributorships

Recently, Noesis Solutions extended its Optimus distribution network by appointing new resellers for UK/Ireland, Korea and India. The new distribution partners were selected on the basis of their local market expertise and their experience in sales and support of advanced CAE-based engineering solutions across manufacturing industries. The Optimus distributors will encourage manufacturers in their regions to fully exploit the capabilities of their virtual prototyping investments. Optimus' groundbreaking design space exploration and optimization capabilities enable their prospects and customers to pick up the habit of timely developing benchmark products.

### CD-adapco in Korea

CD-adapco Korea will sell Optimus through its well-established local organization. CD-adapco has evolved into the world's largest independent CFD-focused provider of engineering simulation software, support and services. As a leading PIDO solution, Optimus perfectly complements the simulation software solutions sold by CD-adapco Korea. [www.cd-adapco.com](http://www.cd-adapco.com)

### Wilde Analysis in UK/Ireland

Noesis Solutions engaged Wilde Analysis as the UK and Ireland distributor. For over 30 years, Wilde Analysis has been helping industry and universities exploit the benefits of engineering simulation and numerical modeling. Today, Wilde Analysis offers a wide range of analysis solutions (including ANSYS) and engineering consultancy services. With Optimus, Wilde Analysis extends its offering for simulation clients requiring in-depth process integration and optimization capabilities to work with their existing FEA, CFD and engineering calculation software. ### Aetos in India

Aetos Design & Engineering has been appointed Optimus distributor for India. Optimus nicely fits with Aetos' software offering in the fields of thermo-fluid system simulation, aerodynamics, CFD and 3D turbomachinery design. Aetos has a dedicated team of design engineers providing technology-focused services. Its extensive experience in design engineering and optimization enables Indian manufacturers to develop better products faster. [www.aetos.co.in](http://www.aetos.co.in)

### About Noesis Solutions

Noesis Solutions, a subsidiary of Cybernet Systems Co. Ltd. in Japan, is a simulation innovation partner to manufacturers in engineering-intense industries. Specialized in simulation process integration and numerical

design optimization, its flagship product Optimus helps customers adopt an 'Engineer by Objective' development strategy. Customers using this approach report design time savings averaging over 30%, while achieving 10% or more product performance improvements. Noesis Solutions operates through a network of subsidiaries and representatives in key locations around the world. The company also takes part in key research projects sponsored by various official organizations, including the European Commission.
