

WHO WE HIRE

We hire people who are not averse to taking risks – we do not hold back our employees in any way when those risky initiatives fail. We don't hire people for a specific task and we are not hemmed in by role definition or organizational structure.

Our team members are encouraged to test their own ideas. We are looking for people who don't keep quiet when they disagree with something, people who get bored easily and need to discover and learn a lot. We aim at hiring people who are multidimensional, combining technical depth with business savvy and creative flair.

WHAT YOU WILL DO

You will be part of the team producing and testing the inhouse developed technology.

You will be responsible for the data management of the production team at Veoware.

You will work closely together with the R&D team to improve the product and the processes of the AIT.

You will assist in writing the processes to streamline the production.

You will optimize the existing production processes with a focus on quality.

MUST HAVE

- You like hands-on work (preparing setups, assembling systems, testing of systems) and you are organized in following/writing procedures.
- You are critical in your testing and prioritize quality over quantity in your work.
- You like to work in an interdisciplinary environment with other departments (software, control, electrical) and have a passion for communication in a technical environment. You have a sense for initiative and responsibility combined with a solution-oriented mindset.
- You follow new trends and developments within your field of expertise and specifically you have an interest in space, space technology, or space exploration.
- You are fluent in English.

DESIRED

- You have experience in data management and data handling of systems.
- You have an interest in automation of production / test processes.
- You have a basic understanding of statistics.
- Experience with industry standards (ECSS).
- Basic understanding of Dutch and/or French is a plus.
