

Opportunities at OTN Systems

## **INTEGRATION- AND SYSTEM-TEST ENGINEER** (Industrial network products and solutions)

OTN Systems, located in Olen, Belgium, develops and markets the Open Transport Network (OTN) and XTran (Excellence in Transport) telecommunication equipment, dedicated to the operational telecommunication departments of metros, light-rails, oil & gas, mining, ITS (intelligent highways, tunnels & bridges), ports, utility companies, public safety and industrial campuses. With OTN Systems' unique products, it is possible to integrate different existing applications for voice, data, LAN, video, SCADA, etc. into one high-speed network with a fibre optic backbone. More specifically, the OTN Systems products are at their best when it comes to mission critical networking. This is made possible by strong investment in product development and a highly skilled workforce, resulting in a unique product portfolio based on cutting edge technology.

To reinforce the 'Test Department' team, OTN Systems is currently looking for an enthusiastic **Integration- and System-Test Engineer (m/f)**

As a test engineer you work in the test department of the R&D organization. Your main interfaces are the R&D Development Teams (Hardware and Software), the Service Organization (technical support for customers, product training,...) and Product Management.

### **Responsibilities**

- Within an agile hardware and software development process you will analyse the product requirements
- As a tester you will be the voice of the customer within the organization and the agile team
- Defining the test scenarios and use these scenarios to align the focus of the agile team
- You are responsible for testing the new products and features
- Improve and extend the automatic tests
- Introduce and support the transition towards continuous delivery
- On-site troubleshooting and field upgrades for pilot installations (sporadically)
- Optional involvement in the help desk guard service

**Profile:**

- Master or bachelor in a relevant technical direction (Electronics, telecom, ICT...)
- Extensive knowledge of IP networking technologies
- Preferably at least 3 years of relevant experience in communication networks
- Knowledge of legacy interfaces is an advantage
- Good mastering of the English language
- Basic knowledge of Dutch is desirable
- Knowledge of Office

**Competences:**

- Analytic ability
- Decisiveness
- Contact skills
- Empathy
- Flexibility
- Assertiveness
- Stress resistance

**We offer:**

- A competitive salary with extra-legal benefits
- A stimulating and challenging environment
- A team where real team players feel at home
- A company that values the contribution of every employee
- An office address that is reachable without traffic-jams
