

Opportunities at OTN Systems

PROCUREMENT & QUALITY MANAGER (Industrial network products and solutions)

OTN Systems, located in Olen, Belgium, develops and markets the Open Transport Network (OTN) and XTran (Excellence in Transport) telecommunication equipment, dedicated to the operational telecommunication departments of metros, light-rails, oil & gas, mining, ITS (intelligent highways, tunnels & bridges), ports, utility companies, public safety and industrial campuses. With OTN Systems' unique products, it is possible to integrate different existing applications for voice, data, LAN, video, SCADA, etc. into one high-speed network with a fibre optic backbone. More specifically, the OTN Systems products are at their best when it comes to mission critical networking. This is made possible by strong investment in product development and a highly skilled workforce, resulting in a unique product portfolio based on cutting edge technology.

To reinforce the Operations Team, OTN Systems is currently looking for an enthusiastic
Procurement & Quality Manager (m/f)

As a Procurement & Quality Manager you work in the Operations Division, reporting to the Vice President Operations. Your main interfaces are the suppliers and the colleagues within the Operations Division and the Customer Solution Managers.

Responsibilities

- As procurement manager, you are responsible for all procurement related matters, such as supplier selection, supply frame agreements and supplier negotiations.
- You build market expertise about EMS (electronic manufacturing services) companies and other electronic and mechanical products striving to continuously improve and innovate the supply chain.
- You assess the performance of suppliers against the operational requirements hereby balancing cost, quality and delivery reliability.
- As quality manager, you are responsible for managing the quality management system of the company in order to assure ISO9001 compliance.

Profile:

- Master in Electronics Engineering
- Knowledge of Supply Chain Management
- Preferably at least 5 years of relevant experience in Supply Chain Management and Quality Management
- Fluent written and spoken Dutch and English
- Willing to travel sporadically

Competences:

- Negotiation skills
- Vision
- Initiative
- Planning & organization
- Result oriented
- Contact skills
- Assertiveness
- Stress resistance

We offer:

- A competitive salary with extra-legal benefits
- A stimulating and challenging environment
- A team where real team players feel at home
- A company that values the contribution of every employee
- An office address that is reachable without traffic-jams
