

**MASTERS IN MISSION CRITICAL COMMUNICATIONS**

# **Invitation to the OTN Systems Oil and Gas Seminar 2019**

Tuesday December 10, 2019

InterContinental Hotel  
Meeting Quarter 1  
King Abdullah Bin Abdul Aziz Al Saud Street  
Abu Dhabi, UAE

## OTN SYSTEMS OIL AND GAS SEMINAR 2019

---

OTN Systems is delighted to invite you to the OTN Systems Seminar 2019 on December 10 in Abu Dhabi.

For more than 30 years, **OTN Systems has been a leading supplier of mission critical telecommunications solutions** to industrial networks such as the Oil & Gas industry. During this period, the company has accumulated over 500 customers in more than 75 countries.

Today, industrial network operators are facing major challenges as rapid technological changes are a fact of life. Traditional SDH/SONET based telecom networks are becoming obsolete and will need to be replaced sooner than later. Furthermore, operators are confronted with an aging workforce, which has accumulated a wealth of operational experience, but knows little about complex IP networking.

To meet these challenges, OTN Systems is helping industrial customers to adopt “full packet” technology without having to face the complexity of generic IP solutions developed with (only) large telecom service providers in mind.

During the forthcoming seminar, OTN Systems will talk about relevant day-to-day operational challenges, sharing with you their recent technology choices to prepare the industrial telecommunication network for the decades to come. In addition, the OTN Systems team will shed some light on the latest portfolio successes and planned evolutions.

Please join us in Abu Dhabi and be part of a seminar stimulating an ‘open exchange of ideas’ on the market- and technological evolution of operational telecom.

Looking forward to meeting you in Abu Dhabi.

---

*“Many of the world’s leading oil and gas companies have chosen OTN Systems as the supplier of their operational telecommunications network.*

*Decisive factors in their choice are the product’s **high reliability, operational simplicity and versatility.** OTN Systems’ network solutions guarantee **maximum uptime at a low operational cost.**”*

## THE OTN SYSTEMS SEMINAR AT A GLANCE

OTN Systems will be sharing their insights on the migration of a telecom network to packet based technologies and how our XTran product portfolio will enable you to create reliable networks which are tailored to your environment and intuitive to operate.

### *Tuesday December 10, 2019*

08:30 – 09:00	Welcome coffee
09:00 – 09:45	OTN Systems: over 30 years of industry expertise
09:45 – 10:45	Spotlight on the MPLS-TP technology
10:45 – 11:00	Morning refreshments break
11:00 – 12:00	XTran portfolio strategy: network scalability, robustness and security
12:00 – 13:00	Networking lunch
13:00 – 14:00	XTran success stories in the Oil & Gas industry: proven experience world-wide
14:00 – 15:00	Seeing is believing: live demo of XTran and TXCare, the intuitive network management platform
15:00 – 15:30	Q&A
