

Opportunities at OTN Systems

## **DevOps Engineer** (Industrial network products and solutions)

OTN Systems, located in Olen, Belgium, develops and markets the Open Transport Network (OTN) and XTran (Excellence in Transport) telecommunication equipment, dedicated to the operational telecommunication departments of metros, light-rails, oil & gas, mining, ITS (intelligent highways, tunnels & bridges), ports, utility companies, public safety and industrial campuses. With OTN Systems' unique products, it is possible to integrate different existing applications for voice, data, LAN, video, SCADA, etc. into one high-speed network with a fiber optic backbone. More specifically, the OTN Systems products are at their best when it comes to mission critical networking. This is possible by strong investment in product development and a highly skilled workforce, resulting in a unique product portfolio based on cutting-edge technology.

To reinforce the DevOps team, OTN Systems is currently looking for an enthusiastic  
**DevOps Engineer (m/f)**

As member of the DevOps technical team, you will be joining a highly effective self-organizing agile team who builds, optimizes and maintains the XTran development systems and works together with the different development teams.

### **Minimum qualifications**

- Professional Bachelor Applied Computer Science, ICT or Electronics-ICT.
- Knowledge of Linux, Windows and Python
- Working proficiency and communication skills in verbal and written English.
- No work experience required

### **Preferred qualifications**

- Experience in System Engineering / DevOps role
- Experience with Linux, Windows and virtualization fundamentals
- Strong Python programming skills
- Experience with common build and release tools such as Gradle, Groovy, Docker and Git
- Ability to multi-task and manage tasks with varying priorities in an agile development environment
- A desire to write tools and applications to automate work, rather than do everything by hand

### **Responsibilities**

- Extend, deploy, maintain and improve the build and release systems of OTN Systems
- Manage individual project priorities, deadlines and deliverables.
- Keep up to date with latest technologies and tools
- Introducing new technologies and platforms into the development activities of the R&D group

**We offer**

- A competitive salary with extra-legal benefits.
- A stimulating and challenging environment.
- A team where real team players feel at home.
- A company that values the contribution of every employee.
- An office address that is reachable without traffic jams.
