Several partners who are committed in this project, have presented themselves to the neighborhood. In this way, residents of the neighborhood could get to know the different ideas and possibilities.

I appreciate the direct communication with the neighborhood

Suggestion: make it even more concrete

The short sessions make sure everyone can keep the focus!

I like the fact that this is a local initiative that makes us more independent of the big players who use unrealistic prices and thus sell us expensive electricity.

I like the combination of citizen participation and thinking about sustainability
