

Are your engineering teams truly collaborating?

Reveal the  
Insights of your  
Engineering Data

# Lets id8 together!

## **Collaborate & Share knowledge**

Make the design process accessible and enable geographically dispersed teams to collaborate and share knowledge and best practices.

01

## **Create trustworthy data**

Explore the design space with intelligent algorithms on pre-configured simulation processes, enabling smart decision making

02

## **Scale operations**

Scale product design activities in a collaborative environment and optimize hardware and software resources with an auto-scalable solution.

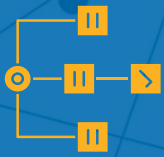

03

## **Unveil engineering data insights**

The advanced post-processing tool equipped with web-based interactive charts enables you to turn data into valuable insights.

04

id8 is a cloud-native **open & customizable platform** that enables **auto-scalable engineering solutions & streamlines engineering design processes** in a collaborative environment. It empowers organizations to take full control of the engineering design process, from **automating simulation workflows** to data-driven business decisions.

Best practice simulation workflows and customized SimApps

Design Intelligence based on Noesis AI technologies

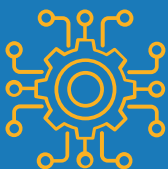

Interactive data analysis dashboards and reporting

Cloud-native open and customizable platform

Secure and Scalable Collaborative framework

Powerful REST API

**id8**  
ideas unlimited

# noesis

a Cybernet Group Company

Established in 2003, Noesis Solutions, a trusted digital engineering innovation partner, has empowered customers adopt a transformational strategy that resolves their toughest multi-disciplinary engineering challenges of today. Our continuously evolving product portfolio, state-of-the-art technology, and unmatched customer services enable customers transform the way they build their products in a much faster and an efficient manner.
