

Noesis Solutions Announces Appointment of New CEO.

PRESS RELEASE

Leuven (Belgium), May 2 - 2019 – Noesis Solutions, a majority-owned subsidiary of Cybernet Systems and a provider of industry-leading Process Integration and Design Optimization (PIDO) software used predominately by manufacturing and engineering-intense applications, announces the appointment of Ms. Reiko Yasue, CEO and President of Cybernet Systems, as its new CEO. Ms. Yasue succeeds Mr. Naji El Masri.

By means of her extensive expertise and strong professional network developed throughout a comprehensive international business career, Ms. Yasue has been a key contributor to the continuous improvement of Cybernet System's corporate values and the growth of the entire Cybernet Group.

"I'm really excited to succeed the management role at Noesis Solutions," says Ms. Yasue. "This company has long been the industry leader and pioneer of PIDO software. Our technology helps customers facilitate product development with a wide variety of system integration tools and enables them to implement their engineering processes more efficiently. With highly talented personnel and a track record of innovation and success at Noesis Solutions, I am fully confident that we can help solve our customers' most challenging engineering process needs."

About Noesis Solutions

Noesis Solutions is an engineering innovation partner to manufacturers in engineering-intense industries.
