

Noesis Solutions Strengthens Information Security Through TISAX® Assessment

Leuven, Belgium – July 31, 2026: [Noesis Solutions](#), a trusted digital engineering innovation partner, announced the successful completion of the TISAX® (Trusted Information Security Assessment Exchange) assessment, demonstrating its commitment to robust information security practices and secure software development.

Developed by the German Association of the Automotive Industry (VDA) and governed by the ENX Association, TISAX provides a recognized framework for assessing and validating information security measures across organizations. This assessment evaluated the information processes and controls implemented by Noesis Solutions against industry-recognized security requirements.

As engineering organizations increasingly rely on digital engineering platforms, AI-enabled workflows, and connected collaboration environments, information security plays a critical role in ensuring the integrity, reliability, and trustworthiness of software solutions. The successful TISAX assessment demonstrates Noesis Solutions' commitment to meeting these expectations through robust information security processes, effective governance, and a culture of continuous improvement.

"Completing a TISAX assessment reflects our ongoing commitment to maintaining strong information security practices across our organization." said Joost Van de Peer, Corporate Information and Security Officer (CISO) at Noesis Solutions. "As engineering organizations increasingly rely on digital engineering, AI, and collaborative & interconnected ecosystems, information security has become more critical than ever and a fundamental pillar for developing and delivering reliable software solutions".

"Our customers rely on us not only to deliver innovative digital engineering solutions, but also to ensure that the software, development processes, and supporting infrastructure behind those solutions meet high standards of security, reliability, and compliance. The TISAX assessment provides an independent review of the processes and controls we have put in place to meet those expectations", he added.

TISAX assessment further strengthens Noesis Solutions' position as a trusted technology partner for organizations operating in highly regulated and security-conscious industries. The assessment offers additional assurance that Noesis Solutions secures its operations, supports secure collaboration, and develops and delivers solutions in accordance with recognized security and compliance requirements. Noesis Solutions was successfully assessed by independent auditors according to TISAX, demonstrating the effectiveness of its Information Security Management System (ISMS), reinforcing its commitment to maintaining strong security practices across its people, processes, systems, and software development activities, which form the foundation for delivering trusted digital engineering solutions to customers worldwide.

About Noesis Solutions

Established in 2003, Noesis Solutions, a trusted digital engineering innovation partner, has empowered customers to adopt a transformational strategy that resolves their toughest multidisciplinary engineering challenges of today. Our continuously evolving product portfolio, state-of-the-art technology, and unmatched customer services enable customers transform the way they build their products in a much faster and an efficient manner.

Noesis Solutions is a wholly owned subsidiary of Cybernet Systems, a leading provider of multi-domain CAE (Computer Aided Engineering) solutions covering a vast range of engineering problems. Headquartered in Leuven, Belgium, Noesis Solutions operates through a network of subsidiaries and representatives in key locations around the world.
