Healthstat.be is the data visualization platform of the [Healthdata.be](#) project, which is part of the national Action Plan eHealth 2013-2018. Here, the researchers publish tables, figures and maps they made based on the data they collected from hospitals, laboratories, physicians, and patients. With these reports, researchers want to give health professionals, healthcare institutions, patients, governments and the general public an up-to-date insight into the prevalence, impact, and the effectiveness of their treatment.

Healthstat.be is a service of the [Scientific Institute of Public Health](#) and funded by the National Institute for Health and Disability Insurance.

You'll find all the necessary info and a user manual here: <https://docs.healthdata.be/healthstat>
